PROFESSIONAL SUMMARY

Aspiring AI/ML Engineer transitioning from more than five years of operations experience, with hands-on experience developing leakage-aware machine-learning and search-intelligence systems. Combines practical knowledge of data quality, process analysis, stakeholder communication, and operational decision-making with Python, SQL, feature engineering, grouped validation, model evaluation, and human-in-the-loop decision support.

AI/ML INTERNSHIP

AI/ML Engineering Intern | Jul 2026 - Present

FlyRank AI - AI/ML Engineering Internship

- Developed an end-to-end search-intelligence pipeline using Python, pandas, DuckDB, SQL, scikit-learn, and matplotlib to prioritize content for manual CTR review.
- Constructed a modelling dataset of 73,481 eligible client-content observations across 33 pseudonymized clients and evaluated a Random Forest using a grouped holdout of 12 clients with zero client overlap.
- Achieved Precision@20 of 0.900 versus 0.250 for a transparent February-only baseline on the held-out population; also completed validation and feature-leakage audits.
- Translated model outputs into a human-review action framework and published reproducible notebooks, aggregate validation charts, public-safe summaries, and a technical capstone paper.

PROFESSIONAL EXPERIENCE

Senior Operations Analyst | Apr 2025 - Present

First Advantage Global Operating Centre | Operations Analyst, Jun 2023 - Apr 2025

- Review approximately 180-200 background-verification cases per day across 20+ suppliers, applying data-quality and compliance checks to identify discrepancies and support accurate decisions.
- Support a 90% within-24-hours turnaround target by prioritizing review queues, tracking exceptions, maintaining accurate case records, and coordinating supplier and internal escalations.
- Analyze recurring discrepancies, communicate documentation gaps, and maintain structured Excel trackers supporting quality reviews, follow-up decisions, and process improvement.

Business Operations Analyst | Mar 2022 - May 2023

Dunzo Digital Pvt Ltd

- Investigated billing, refund, and account issues across customer, delivery-partner, and merchant workflows using structured case review and root-cause analysis.
- Coordinated with delivery-partner, merchant-support, and internal teams to document outcomes, escalate exceptions, and identify recurring process gaps.

Operational Specialist | Jan 2021 - Mar 2022

Reliance Jio Infocomm

- Resolved network, billing, account, and SIM-activation queries through structured troubleshooting, system checks, and clear customer communication.
- Maintained accurate interaction records, followed escalation procedures, and identified recurring service issues requiring technical or back-office support.

SELECTED PROJECT

Search Intelligence Engine & Content Opportunity Scoring

[Public project](#) | [GitHub repository](#)

- Framed whether February search and engagement signals could prioritize content likely to have below-benchmark CTR in March more effectively than a transparent February-only baseline.
- Built a grouped-validation pipeline, conducted a leakage audit, and converted model scores into a human-review framework with monitoring and retraining triggers.
- The Random Forest achieved Precision@20 of 0.900 versus 0.250 for the baseline; published the research paper, notebooks, charts, and public-safe summaries.

EDUCATION

B.Sc. Data Science and Analytics | 2025-2028

Jain University

Diploma in Civil Engineering | Completed 2020

Government Women's Polytechnic, Hubli

TECHNICAL SKILLS

Programming and Data: Python, SQL, pandas, NumPy, DuckDB, Excel, data cleaning, exploratory analysis

Machine Learning: Feature engineering, classification, grouped validation, baseline design, leakage detection, model evaluation, Precision@K

Libraries and Visualization: scikit-learn, matplotlib

Applied AI/ML: Search intelligence, decision-support workflows, human-in-the-loop systems
